Ponuda na stočnim pijacama	2-3
Pregled cijena žive stoke	3-7
Vještačko osjemenjivanje u govedarstvu	8

PONUĐA NA STOČNIM PIJACAMA

Slabija ponuda

Visoke temperature uslovljavaju slabu ponudu stoke na stočnim pijacama u Crnoj Gori. Slično ovom i potražnja i broj kupaca su veoma mali. I dalje je najbolja ponuda jagnjadi, teladi i krava za klanje, kojih je bilo na svim pijacama dok je, i dalje, najslabija ponuda priplodnih grla u govedarstvu.

Kada je riječ o cijenama, nema bitnijih promjena u odnosu na prethodnu nedjelju.

Bar

Nastavlja se blagi pad cijene jagnjadi zbog veće ponude sa sjevera Republike. Cijene ostalih kategorija stoke su bez bitnih odstupanja. Ponude stoke na pijaci nema tako da cijene potiču sa farmi i sa klanica.

Berane

Ove sedmice na stočnoj pijaci u Beranama ponuda, tražnja i cjenovni trend su nepromijenjeni u odnosu na prethodnu.

Dobra ponuda je bila kod kategorija teladi, prasadi, jagnjadi, priplodnih ovaca i priplodnih krava (melezi). Najveća

tražnja je kod priplodnih krava i junica u čistoj rasi.

Nikšić

Cijene žive stoke u Nikšiću na istom su nivou kao i prethodne nedjelje.

Na stočnoj pijaci nije bilo ponude, tako su cijene uzete direktno od farmera.

Pljevlja

U protekloj sedmici cijene i ponuda na pijacama u Pljevljima ostale su nepromijenjene u odnosu na prethodnu nedjelju.

Podgorica

I ovog ponedjeljka, zbog velikih vrućina, mala je posjećenost podgoričke stočne pijace. Trgovina se obavlja u ranim jutarnjim satima i traje negdje do jedanaest, ponuđene stoke je veoma malo a to što se nudi čeka na rijetke kupce. Zbog toga je i blagi pad cijene kako junadi koja su do sada imala najjednačnije cijene tako i ostalih kategorija stoke.

Bijelo Polje

Na bijelopoljskim stočnim pijacama i u toku ove sedmice se zadržala relativno niska ponuda svih vrsta i kategorija stoke.

Izuzetak su jagnjad, čija ponuda je trenutno najbolja, mada se dio njihove prodaje odvijao i na farmama. Cijene su zadržale nepromjenjen nivo.

VJEŠTAČKO OSJEMENJIVANJE U GOVEDARSTVU

Vještačko osjemenjivanje je biotehnička mjera koja se relativno dugo sprovodi u Crnoj Gori. Pomoću ove mjere izmijenjen je rasni sastav populacije u govedarstvu u pravcu stvaranja čistih rasa. Međutim, u populaciji je prisutan značajan procenat meleza što daje prostora da se ova mjera populariše još više.

Prednosti vještačkog osjemenjivanja su slijedeće:

- brži genetski napredak
- kontrolisano razmnožavanje do nivoa individue
- superiorni bikovi mogu dati i do 100.000 potomaka
- relativno prihvatljiva cijena sjemena elitnih bikova
- zamrzavanjem omogućeno dugo korišćenje sjemena
- postupkom testiranja eliminišu se bikovi sa lošim ocjenama
- ne postoji rizik od širenja određenih bolesti
- lakša identifikacija steriliteta i njegovo suzbijanje
- uspješnije vođenje menadžmenta na farmi
